LETS TALK ABOUT

PEP

WHAT IS PEP?

PEP is Post-Exposure Prophylaxis

PEP is an emergency medicine that can stop HIV before it infects your body

WHEN SHOULD I TAKE PEP?

If you are HIV-negative and think you have been exposed to HIV

Up to 72 hours after exposure to HIV (through sex without a condom, injection drug use, physical and/or sexual assault)

HOW DOES PEP WORK?

PEP should be taken immediately and must be taken continuously for 28 days
